

# CuraHub

Connecting Patients and Doctors

# How Does it Work?

Doctors set Availability,

Patients View Available Doctors,

Patients Schedule Appointments.

# Additional Features

Our Goal is to make this as hassle free and as clear as possible, so we send out automated emails for every step.

We will have a rating system so patients will know for sure that the doctor they choose is right for them.

We will ensure that our patient's data will stay safe, because Doctors will have extra authentication when viewing their data.
